

Claim Approval Policy

Approval authority based on total claim amount

Purpose

This policy defines the required approval level for a claim according to its total claim amount. It is written as a concise knowledge source for Retrieval-Augmented Generation (RAG).

Approval Authority Matrix

Claim Amount	Required Approver	Approval Rule
Less than \$5,000	Adjuster	An adjuster may approve the claim.
\$5,000 to \$10,000	Senior Adjuster	A senior adjuster must approve the claim.
More than \$10,000	Manager	A manager must approve the claim.

Boundary interpretation: A claim of exactly \$5,000 requires Senior Adjuster approval. A claim of exactly \$10,000 also requires Senior Adjuster approval. Manager approval starts only when the amount is greater than \$10,000.

Decision Logic for RAG

- IF total_claim_amount < 5000, THEN required_approver = Adjuster.
- IF 5000 <= total_claim_amount <= 10000, THEN required_approver = Senior Adjuster.
- IF total_claim_amount > 10000, THEN required_approver = Manager.

RAG Question and Answer Examples

Question	Answer
Who can approve a \$4,999 claim?	An Adjuster can approve it because the claim amount is below \$5,000.
Who approves a \$5,000 claim?	A Senior Adjuster must approve it because \$5,000 is included in the \$5,000 to \$10,000 range.
Who approves a \$10,000 claim?	A Senior Adjuster must approve it because \$10,000 is included in the \$5,000 to \$10,000 range.
Who approves a \$10,001 claim?	A Manager must approve it because the claim amount is above \$10,000.

Scope note: This document defines approval authority only. Claim eligibility, policy coverage, fraud review, required evidence, and payment authorization may be governed by separate policies.
