

Claim Total Review Policy (v2)

Customers qualify for review when $\text{SUM}(\text{ClaimAmount}) \geq \text{total_values}$.

Rule	Definition
Selection condition	Include customer when $\text{SUM}(\text{ClaimAmount}) \geq \text{total_values}$
Boundary rule	Customers whose total equals total_values are INCLUDED
Detail retrieval	Return all claim transactions for qualifying CustomerID values

Updated SQL Example

```
HAVING SUM(ClaimAmount) >= @total_values
```

RAG Example: If total_values = 50000 and customer total is exactly 50000, the customer is included and all related claim transactions are returned.
